

SUROJIT MONDAL

msurojit890@gmail.com | +91 78720 74546 | [Portfolio](#) | [GitHub](#)

SUMMARY

Computer Science undergraduate focused on backend and DevOps engineering, with hands-on experience designing REST APIs, relational data models, and authentication systems, and containerizing full-stack applications with Docker Compose. Comfortable owning a service from schema design through deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C, SQL

Backend: Node.js, Express.js, NestJS, RESTful API design, JWT authentication

Databases: PostgreSQL, MongoDB, Prisma ORM

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Postman, Swagger

Frontend: React, Next.js, Tailwind CSS

PROJECTS

HRMS — Human Resource Management System | [GitHub](#)

Next.js, NestJS, PostgreSQL, Prisma ORM, Docker Compose, JWT, Swagger

- Designed and built a role-based HRMS with a NestJS backend and Next.js frontend in a monorepo, covering employee management, attendance, leave requests, and payroll.
- Built JWT authentication with email verification and role-based access control (RBAC) to separate Admin, HR, and Employee permissions across all API endpoints.
- Built a payroll engine that automates salary calculations (HRA, PF, tax, allowances) to generate accurate net pay.
- Containerized the frontend, backend, PostgreSQL, and Mailpit SMTP services with Docker Compose using multi-stage builds for reproducible, one-command local deployment.
- Documented all REST endpoints with Swagger to make the API self-service for other developers.

Movie Ranking App | [GitHub](#)

React, Vite, Appwrite, TMDB API, Tailwind CSS

- Built real-time movie search with debounced input handling to cut redundant API calls to the TMDB API.
- Integrated an Appwrite backend to log and track search analytics for usage insights.

Book Recommendation System | [GitHub](#)

Python, Streamlit, Pandas, Open Library API

- Built a recommendation engine integrating the Open Library API for author- and category-based book matching, served through a Streamlit UI.

EXPERIENCE

Frontend Developer Intern | Univolve Consulting | June 2025 – August 2025

- Built responsive UI features for Vouch, an influencer-brand collaboration platform, using React, TypeScript, and Tailwind CSS.
- Worked directly with backend and design teams to turn Figma designs into production-ready interfaces as part of a live product build.

EDUCATION

B.Tech in Computer Science | Adamas University | 2022 – 2026

Higher Secondary | DAV Public School | 2020 – 2022

Secondary | DAV Public School | 2011 – 2020

CERTIFICATIONS

Problem Solving Through Programming in C — NPTEL
